## **PECO Procurement: Fall 2009 Solicitation Results Rate Impact**

In the PECO Energy Default Service Plan settlement filing, which was approved by the Pennsylvania Public Utility Commission on April 16, 2009, parties agreed to the public release of certain information regarding the results of each solicitation 30 days after the solicitation (or 21 days before the supply period starts, whichever comes earlier). The Fall 2009 solicitation was held on September 21, 2009 for supply starting on January 1, 2011. The following information about the Fall 2009 solicitation, and the aggregate baseload Block Energy results from the Fall and Spring 2009 solicitations is provided in accordance with the PUC Order:

### **Fall 2009 Solicitation Results Full Requirements Products: Residential Class**

Rate impact, based on Spring 2009 and Fall 2009 results: **9.41 cents/kWh**, indicating a **4 percent** increase for the average residential customer beginning 2011.

### **Fall 2009 Solicitation Results Full Requirements Products: Small Commercial and Medium Commercial Classes (aggregate results)**

Rate impact, based on Fall 2009 results: **9.79 cents/kWh**, indicating a **0.5% percent decrease** for the average small/medium commercial customer beginning 2011.

[Exhibit G](#) of the settlement states that the average bid price and rate impact for a class are released as long as supply for at least 10 tranches has been procured for that class. Because the Fall 2009 solicitation sought Full Requirements supply for 6 tranches of Small Commercial and 3 tranches of Medium Commercial, results by class, for these products are not being released at this time. If the Spring 2010 solicitation results in supply for at least 4 tranches being procured for the Small Commercial class, and/or at least 7 tranches being procured for the Medium Commercial class, aggregate results, by class, from the Fall 2009 solicitation and the Spring 2010 solicitation will be released subsequent to the Spring 2010 solicitation in accordance with the settlement.
