

## ERRATA (MARCH 31, 2009)

The "PECO DSP Conference Call - Materials" contained one typographical error on slide 11. This error has been corrected and highlighted in yellow as provided below.

Please note that on slide 11, for Peak Products: 5x16, the winter months are Dec-Feb. It was incorrectly stated as Dec-Jan.

## Block Energy is fixed MW for energy only

- Block Energy Supply will comprise approximately 20 percent of annual load of default supply customers in Residential Class
- Block Energy Supply includes the energy only
- A supplier supplies a constant quantity of energy delivered to the PE Zone during supply period
- Calendar year delivery periods

### Baseload: 7 x 24

- 160 MW – 1 year product
- 100 MW – 2 year product
- 50 MW – 5 year product

### Peak Products: 5 x 16

- 80 MW – Winter (Dec - Feb)
- 130 MW – Summer (Jun-Aug)

- Block sizes may change in subsequent procurements, subject to a load adjustment mechanism

Note: This presentation is based on PECO's Default Service Plan ("DSP") and the Joint Settlement among all parties in PECO's DSP case and is pending approval by the PA PUC.
